Helping Your Business Climb With Technology!

"Every successful individual knows that his or her achievement depends on a community of persons working together." — Paul Ryan

OUR MISSION

At Mountaineer IT, we believe in relationships! Striving to provide a culturally passionate environment for our employees. Building a stronger community by providing leadership and quality support for your information technology needs. Our goal is to take your mind off of I.T, so that you can focus on doing what you do best!

OUR VALUES

–To have a great employee environment, to build strong values and culture

–To provide great customer services.

–To offer opportunities and growth for employees

–Have strong ties with the community and to give back

Jennie Onarhiem We started using Mountaineer IT several months ago. I am very impressed with Christopher's knowledge and

scope of abilities. He spent time asking questions and getting to know our business and potential needs. We are now confident in our information being secure and retrievable. He has helped to upgrade and install some new equipment, works with our software, and is able to help with questions on how to use different office equipment features. He has offered advice on future upgrades that may be potentially useful, promoting our company, such as integrated software and website management. He also has identified vulnerabilities that could potentially be liabilities. This gives me confidence that Mountaineer IT has our best interests in mind and is reasonable, and reliable making them a company I would highly recommend to meet any of your computer needs.

Jason Robinson Excellent customer service. Installed a Security system for me at my business center. Quick service, reasonably priced and no problems to report. Will do business again.

Kaitlyn Cutler Chris regularly served our hotel property in Avila Beach, CA when he lived on the Central Coast and was always friendly, efficient, and knowledgeable while working with our computers and network. He is a genuine person that keeps your best interests in mind; he is ethical and effective at his work. I'm very grateful we had his help!

Hayley Hudson Our agency has been working with Mountaineer IT for six months. The knowledge of the Mountaineer IT staff and amazing customer service they provide is outstanding! Mountaineer IT has helped with projects large and small at our agency. These projects include updating our server hardware and software, setting up workstations, and working with staff to implement and learn new upgraded email and statistical reporting software. Our agency is fortunate to have their continued support in any and all IT related issues. The quality of support they offer is what our community needs. We are excited and grateful for the relationships we have built and will continue to build with Mountaineer IT, in order to support a stronger and safer community.

Thomas Timmons The owner does good work and very informative. Helped me a few years back when my laptop took a dump. He showed me what he was doing and walked me through it. I would recommend.
